

$$E = \begin{pmatrix} 1 & -1 & 3 & -2 & 1 \\ -2 & 3 & -5 & 3 & -1 \\ 1 & -1 & 4 & -2 & 2 \\ -1 & 4 & -1 & 0 & 2 \\ 1 & 0 & 5 & -2 & 4 \end{pmatrix}$$

Compute the inverse of  $E$ ,  $\langle \text{inverse} | E \rangle$ , by forming the  $5 \times 10$  matrix  $\langle \text{augmented} | E | I_5 \rangle$  and row-reducing ( $\langle \text{acronymref} | \text{theorem} | \text{CINM} \rangle$ ). Then use a calculator to compute  $\langle \text{inverse} | E \rangle$  directly.

Enuentre la inversa de  $E$ , formando una matriz de  $5 \times 10$   $\langle \text{augmented} | E | I_5 \rangle$  y haciendo reduccion por filas ( $\langle \text{acronymref} | \text{theorem} | \text{CINM} \rangle$ ). usea una calculadora para calcular  $\langle \text{inverse} | E \rangle$  directamente.
